

**For the price of ten aliens
you can now communicate
with far friendlier beings.**

This Modem will put your Com

Your Commodore's unpacked, your keyboard's plugged in – congratulations.

Welcome to the wonderful world of micro-computing.

Now what ambitions would you like to fulfil?

You could become a galactic hero beating innumerable aliens.

You could become a veritable mastermind by studying educational programs.

Whatever your choice a Communications Modem is a must.

Because it'll save you pounds on games, and offers an incredible curriculum of free educational programs.

Easy to fit.

Our communications Modem plugs into your computer's cartridge port, and telephone line,* thereby linking your Commodore 64 to a giant mainframe.

This data source is far larger than anything most individuals could afford.

What's more you don't need to be a computer whizz kid to log onto this mainframe.

Just tap out a couple of codes and you're there.

APPROVED for use
with all Commodore systems
run by British Telecommunications
in accordance with the conditions
of the licence for use.

Commodore 64 in touch with reality.

Now you see it.

Your Modem lets you call on page after page of information from services like Prestel and Micronet.†

And the exciting new Compunet.

Compunet, it's unique.

Compunet heralds a major breakthrough in home computer communications.

As at last you can send information to, and receive information from, a mainframe.

Software galore.

And a lot of it's free**; free games, free information and free educational programs.

Free from hassle too.

Because you can select quality software from Compunet then save it onto cassette or disk.

So you'll soon build a software library without having to spend much money.

What comes down, also goes up.

You can also send information up the line to Compunet's mainframe.

So you can advertise anything you have to sell.

And as every other Modem owner has equal access you can communicate with each other via notice boards.

This allows you to leave messages, exchange ideas, and generally keep in touch with other Commodore 64 owners.

Compunet delivers the goods.

Besides cheaper and free software, you can also take advantage of a competitive tele-shopping service.

Free for all.

As a special offer we're giving a free

year's subscription to Compunet when you order a Modem.
Representing a saving of £30.

Add this to the reductions you can get on many purchases through Compunet and you can see the obvious advantages in owning a Modem.

What price for the world at your fingertips?

A Modem costs much the same as 10 aliens.

Or, to be precise, £99.99.

Which is money well spent, considering the savings you can make on a wide range of software and services.

Therefore it makes sense to install a Modem before stocking up with software.

If you'd like a Modem or more information, complete the coupon below.

Commodore Communications Modem,
1 Hunters Road, Weldon, Corby,
Northamptonshire NN17 1QX.
